Sherwin-Williams

Roof and Bridge Paint

Prepared ready for use in Pint, Quart, Half-Gallon and Gallon Tins.

Uses.—For use on corrugated galvanised iron roofs, barns, bridges, structural iron work, metal and tin structures, and buildings of rough timber.

Description.—Works freely and easily under the brush, has good covering capacity and great durability. This product undoubtedly offers greater paint value for the purposes intended than any other similar paint on the market.

Direction for Use.—Always remove all loose paint with a scraper or steel brush if best results are desired. Stir thoroughly from bottom of tin. Brush the paint in well, spreading evenly. If necessary to thin, use pure raw linseed oil. On all new galvanised iron surfaces use S-W Galvanised Iron Primer first.
